HEALTHCARE PROCUREMENT PORTFOLIO

BUILDING COMPETITIVE HEALTHCARE BUSINESSES THROUGH INDIAN MANUFACTURING

The philosophy behind Khetsi International LLP and why we exist.

Healthcare distribution is evolving.

Across emerging and developed markets alike, healthcare providers expect broader product portfolios, consistent quality, faster availability, and greater value. For distributors, meeting these expectations requires more than dependable suppliers—it requires a procurement strategy that strengthens competitiveness while ensuring long-term supply continuity.

For decades, the global market has largely been defined by two extremes: premium international brands commanding premium prices, and low-cost alternatives compromising on quality or price. Between these two ends of the spectrum, India has emerged as one of the world's most capable healthcare manufacturing ecosystems—combining engineering expertise, internationally recognized quality systems, manufacturing flexibility, and commercial competitiveness.

The opportunity, however, extends beyond access to manufacturers. It lies in identifying the right manufacturing capabilities, developing stronger product portfolios, responding to changing market requirements, and building procurement partnerships that support sustainable business growth.

“

We believe competitive advantage is not created by purchasing more products.

It is created by making better procurement decisions.

”

KHETSI INTERNATIONAL PHILOSOPHY

COMPETE SMARTER

Helping healthcare businesses build stronger product portfolios through India's manufacturing capabilities.

PROCURE BETTER

Transforming procurement from a purchasing function into a strategic business advantage.

GROW TOGETHER

Building partnerships designed to create sustainable value for distributors, manufacturers, and the healthcare systems they serve.

HOW KHETSI INTERNATIONAL LLP CREATES VALUE

FOR HEALTHCARE DISTRIBUTORS

The most successful healthcare distributors are rarely distinguished by the number of suppliers they work with.

They are distinguished by the quality of their procurement decisions.

At Khetsi International LLP, we combine market intelligence, manufacturing expertise, and commercial execution to help healthcare businesses build stronger product portfolios, improve sourcing decisions, and create long-term competitive advantage through Indian manufacturing.

“

Our role is not simply to facilitate exports. It is to help healthcare distributors build stronger businesses by transforming procurement into a strategic competitive advantage.

”

OUR APPROACH IS BUILT AROUND FIVE PRINCIPLES

1. MANUFACTURING INTELLIGENCE

Finding manufacturers is easy. Identifying the right manufacturing partner requires continuous market knowledge, technical understanding, and long-term industry relationships.

We continuously evaluate manufacturing capabilities, product innovations, production capacity, quality systems, and export readiness to help our partners make informed sourcing decisions.

2. PORTFOLIO DEVELOPMENT

Healthcare markets continue to evolve.

We help distributors identify complementary product categories, expand their offerings strategically, and develop portfolios that strengthen their competitive position in local markets.

Growth should be intentional—not accidental.

3. PROCUREMENT STRATEGY

Every market has different commercial realities.

Rather than treating procurement as a purchasing activity, we approach it as a business strategy—balancing quality expectations, commercial objectives, product positioning, and long-term supply continuity.

4. COMMERCIAL EXECUTION

Successful procurement extends beyond selecting a manufacturer.

From commercial coordination and production planning to documentation, shipment management, and communication, disciplined execution ensures procurement decisions translate into reliable business outcomes.

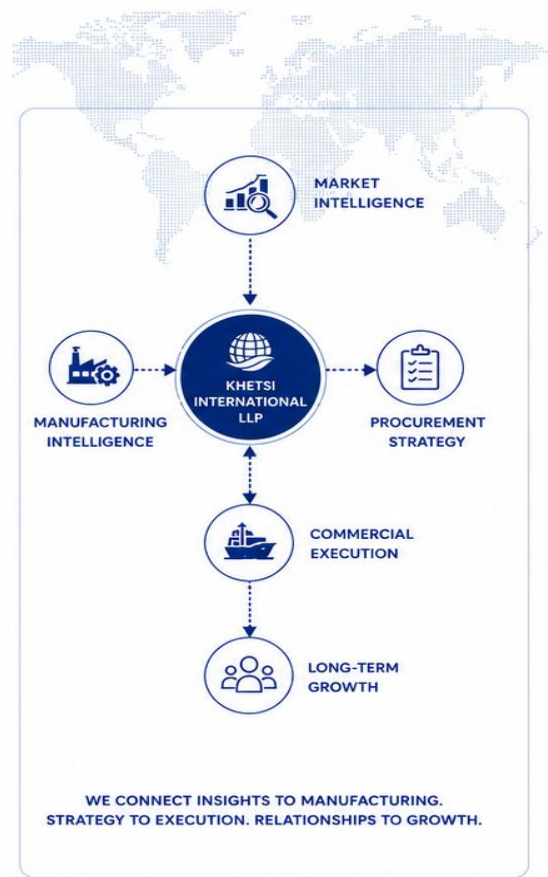

5. LONG-TERM PARTNERSHIP

Markets evolve.

Customer expectations change.

Product portfolios expand.

We believe procurement partnerships should evolve alongside them, creating value through consistency, responsiveness, and continuous collaboration rather than individual transactions.

WHY INDIA

THE MANUFACTURING ADVANTAGE

Healthcare procurement today is about more than securing competitive pricing. It requires manufacturers capable of delivering consistent quality, regulatory compliance, product innovation, and dependable supply at a commercial scale.

Over the past three decades, India has evolved into one of the world's most established healthcare manufacturing ecosystems, serving distributors, healthcare institutions, private-label brands, and global medical companies across more than 200 countries.

For international healthcare buyers, India represents a unique combination of manufacturing capability, commercial competitiveness, and long-term supply reliability.

WHY KHETSI INTERNATIONAL LLP?

India provides the manufacturing strength. Khetsi International LLP helps you unlock its full commercial potential.

Through carefully selected manufacturing partnerships, procurement intelligence, and coordinated export execution, we help international healthcare businesses transform India's manufacturing capabilities into sustainable competitive advantage.

WHY GLOBAL HEALTHCARE BUYERS SOURCE FROM INDIA

MATURE MANUFACTURING ECOSYSTEM

Thousands of specialized healthcare manufacturers, supported by decades of production expertise, enable access to a broad portfolio of surgical consumables, medical devices, and healthcare products.

QUALITY-TO-COST ADVANTAGE

Indian manufacturing delivers an exceptional balance between internationally recognized quality standards and commercial competitiveness—helping distributors strengthen their market position without compromising product performance.

GLOBAL MANUFACTURING CONFIDENCE

Healthcare products manufactured in India are supplied to hospitals, distributors, healthcare brands, and procurement organizations worldwide, reflecting growing international confidence in Indian manufacturing capabilities.

OEM & PRIVATE LABEL EXPERTISE

India has become a preferred destination for distributors seeking customized manufacturing, private label development, and flexible production solutions tailored to diverse market requirements.

SCALABLE & FLEXIBLE SUPPLY

From standard product lines to customized procurement programs, India's manufacturing ecosystem offers the production capacity and flexibility required to support both growing distributors and established healthcare organizations.

INDIA.
MANUFACTURING STRENGTH.
GLOBAL IMPACT.

“

The future of healthcare procurement is not choosing between cost and quality. It is partnering with manufacturing ecosystems that consistently deliver both.

”

OUR SURGICAL PORTFOLIO

A COMPREHENSIVE RANGE. TRUSTED SOLUTIONS.

Our surgical portfolio includes carefully selected categories that support healthcare professionals, distributors, and institutions with dependable, high-quality, and compliant products.

Each category is backed by quality, consistency, and a commitment to better care.

QUALITY YOU CAN TRUST. CARE YOU CAN DELIVER.

Every product is sourced from reliable manufacturers and meets global quality and regulatory standards.

CURATED CATEGORIES

Focused on essential needs across surgical care.

CONSISTENT QUALITY

NON WOVEN MICRO POROUS SURGICAL PAPER TAPE

Comfortable. Breathable. Reliable.

Crafted from a highly breathable, microporous synthetic non-woven fabric, our tape delivers secure fixation with exceptional skin comfort.

The hypoallergenic adhesive ensures strong hold without irritation, while the open structure keeps air flowing and moisture escaping – so dressings, catheters and tubes stay in place reliably.

Engineered for versatile use in surgical, clinical and home settings, this tape blends performance and patient comfort in one smart solution.

KEY FEATURES

HIGHLY BREATHABLE

Microporous structure allows air circulation and moisture escape for better skin comfort.

HYPOALLERGENIC ADHESIVE

Gentle on skin yet provides secure and reliable fixation without causing irritation.

STRONG & SECURE HOLD

Ensures dressings, catheters and tubes stay in place even during movement.

WATER & MOISTURE RESISTANT

Maintains adhesion and integrity even in moist conditions.

SOFT & CONFORMABLE

Conforms easily to body contours for a comfortable and snug fit.

VERSATILE APPLICATION

Ideal for surgical, clinical and home care use on sensitive or fragile skin.

APPLICATIONS

Secure fixation of dressings

Fixation of catheters and cannulas

Retention of medical tubing

To retain first aid dressings on the wound

Suitable for surgical, clinical and home care use

WOUND CARE & MEDICAL CONSUMABLES

KHETSI INTERNATIONAL

INDIAN ROOTS, GLOBAL STANDARDS

ZINC OXIDE ADHESIVE PLASTER

Designed for reliable fixation and lasting comfort, our Zinc Oxide Adhesive Plaster is made from high-quality cotton fabric coated with a non-allergenic, non-irritating adhesive for gentle skin contact.

The 20% zinc oxide content imparts mild antiseptic, antiphlogistic, and anti-inflammatory properties, supporting protection and recovery.

It offers easy unrolling, strong adhesion, and secure fixation even during movement, while remaining breathable and comfortable for extended wear.

Ideal for securing dressings, and supporting joints, it ensures dependable performance with every use.

- ✓ MILD ANTISEPTIC
- ✓ ANTIPHLOGISTIC
- ✓ ANTI-INFLAMMATORY

KEY FEATURES

SKIN FRIENDLY

Non-allergenic, non-irritating adhesive ensures gentle and safe contact with skin.

20% ZINC OXIDE

Provides mild antiseptic, antiphlogistic, and anti-inflammatory benefits.

STRONG & SECURE ADHESION

Ensures reliable fixation of dressings and support even during movement.

BREATHABLE & COMFORTABLE

Allows air circulation and maintains comfort during prolonged use.

EASY TO USE

Easy unrolling with uniform texture for quick and convenient application.

VERSATILE SUPPORT

Ideal for securing dressings and supporting muscles and joints in injuries.

APPLICATIONS

Fixation of dressings

Fixation of catheters and medical devices

Support and immobilization of muscles and joints

Management of sprains, strains, and sports injuries

To retain first aid dressings on the wound

ELASTIC ADHESIVE BANDAGE

Our Elastic Adhesive Bandage provides firm and reliable support with excellent stretch and conformability, ensuring comfort and security during movement.

Formulated with 20% Zinc Oxide, it offers mild antiseptic, antiphlogistic, and anti-inflammatory properties, helping to protect and soothe the skin.

The bandage features strong adhesion for long-lasting hold, yet allows for easy and painless removal without irritation.

Ideal for sports injuries, joint support, and post-operative applications, it combines flexibility, protection, and skin-friendly performance in one trusted solution.

KEY FEATURES

HIGH ELASTICITY

Excellent stretch and conformability for secure support and freedom of movement.

20% ZINC OXIDE

Mild antiseptic, antiphlogistic and anti-inflammatory properties help protect and soothe the skin.

STRONG ADHESION

Provides long-lasting hold, stays in place even during active use.

SKIN FRIENDLY

Easy and painless removal without causing irritation.

FLEXIBLE & BREATHABLE

Allows air circulation while maintaining effective support and compression.

APPLICATIONS

Supports sprains and strains

Joint and muscle support

Post-operative dressing retention

Orthopaedic support and rehabilitation

Preventive taping in sports to reduce strain and enhance performance

COTTON-CREPE BANDAGE

Our cotton-crepe bandage offers reliable support and comfort. Crafted from breathable, skinfriendly cotton and designed for secure, easy fixation of dressings, splints or wound pads, it delivers value without compromising on performance.

Ideal for everyday wound-care needs, it gives healthcare professionals and patients alike the confidence of dependable care-layer after layer.

**MADE FROM
PURE COTTON**

**BREATHABLE &
SKIN FRIENDLY**

**STRONG &
DURABLE WEAVE**

**RELIABLE SUPPORT
YOU CAN TRUST**

KEY FEATURES

BREATHABLE & SKIN FRIENDLY

Made from high-quality cotton that allows air circulation and is gentle on the skin.

SECURE & EASY FIXATION

Provides firm hold for dressings, splints or wound pads without slipping.

STRONG & DURABLE

Cotton-crepe weave ensures excellent stretch, durability and long-lasting performance.

SOFT & COMFORTABLE

Soft texture ensures patient comfort even during prolonged use.

COST-EFFECTIVE CARE

Offers dependable performance and great value for everyday wound care.

VERSATILE USE

Suitable for a wide range of clinical, sports and post-operative applications.

APPLICATIONS

Provides firm support and compression in sprains and strains

Supports muscles and joints in injuries

Ideal for post-operative care

Helps reduce oedema (swelling)

Improves blood circulation

Immobilizes affected areas during recovery

ELASTIC COTTON CREPE BANDAGE

Designed for superior support and comfort, our Elastic Cotton Crepe Bandage is made from high-quality cotton yarn with better elasticity and compliance, ensuring consistent compression and excellent stretch recovery.

Reusable and washable, it maintains its shape and elasticity even after multiple uses. Soft, breathable, and gentle on the skin, it provides effective support for sprains, strains, joint pain, and post-operative care, making it ideal for both medical and sports applications.

KEY FEATURES

HIGH ELASTICITY

Better elasticity and compliance for consistent compression and excellent stretch recovery.

DURABLE & REUSABLE

Inter-woven structure enhances durability and maintains shape and elasticity even after multiple uses.

SOFT & BREATHABLE

Soft, breathable and gentle on the skin for prolonged comfort.

SKIN FRIENDLY

Made from high-quality cotton yarn, safe and comfortable for all skin types.

KHETSI INTERNATIONAL

INDIAN ROOTS, GLOBAL STANDARDS

PLASTER OF PARIS BANDAGE

Our Plaster of Paris Bandage delivers rapid, reliable immobilisation due to a high-quality plaster formulation combined with a specially woven leno-cloth backing.

The interlocked weave ensures excellent stability and conformability, minimising plaster loss and enabling precise moulding around contours.

With a smooth, creamy texture and fast-setting characteristic, it produces a strong, aesthetically pleasing cast that supports recovery with confidence.

Packaged in moisture-resistant wrap and mounted on a round core for superior handling, this bandage is the smart choice for trauma care, orthopaedics and fracture management.

KEY FEATURES

RAPID IMMOBILISATION

High-quality plaster formulation ensures fast setting and reliable immobilisation for better patient outcomes.

SUPERIOR STABILITY

Specially woven leno-cloth with interlocked weave provides excellent stability and conformability.

EXCELLENT MOULDING

Minimises plaster loss and allows precise moulding around body contours for accurate support.

SMOOTH & FAST SETTING

Smooth, creamy texture with fast-setting characteristic for strong, aesthetically pleasing casts.

MOISTURE-RESISTANT PACKAGING

Individually wrapped in moisture-resistant wrap and mounted on a round core for superior handling and shelf life.

APPLICATIONS

Fracture immobilization

Orthopaedic splinting

Support of injured bones and joints

Emergency fracture management

Post-operative casting

Correction of bone deformities

FIBERGLASS CASTING TAPE

Our Fiberglass Casting Tape offers superior immobilization with a lightweight, durable, and comfortable design.

Made from a high-strength fiberglass substrate coated with a fast-setting resin, it ensures excellent mouldability, a smooth surface finish, and secure support for various orthopaedic applications.

It requires fewer rolls and less re-casting, saving both time and material. Engineered for incredible strength, long-lasting durability, air-permeability, and X-ray transparency, it allows better skin comfort and easy monitoring of healing progress.

Available in a range of attractive colours, it combines functionality with patient comfort – making it the ideal choice for modern fracture management and orthopaedic care.

KEY FEATURES

LIGHTWEIGHT & COMFORTABLE

Lightweight construction ensures patient comfort and ease of application.

SUPERIOR STRENGTH

High-strength fiberglass with excellent durability for reliable immobilization and support.

EXCELLENT MOULDABILITY

Fast-setting resin provides excellent moulding and a smooth, hard finish for precise support.

LESS RE-CASTING

Requires fewer rolls and less re-casting, saving time, effort, and material.

AIR-PERMEABLE

Allows air circulation to improve skin comfort and reduce risk of irritation.

X-RAY TRANSPARENT

Enables clear X-ray imaging for easy monitoring of healing progress without removing the cast.

AVAILABLE IN COLOURS

Offered in a range of attractive colours to enhance patient experience.

APPLICATIONS

Immobilization of fractures

Orthopaedic splinting

Postoperative support

Corrective splints

Supportive braces in trauma and rehabilitation

KHETSI INTERNATIONAL

INDIAN ROOTS, GLOBAL STANDARDS

ORTHO ROLL CAST PADDING

Our Ortho Roll Cast Padding provides a soft, protective, and comfortable under-cast layer, ensuring optimal cushioning between the skin and the rigid cast.

Made from high-quality non-woven viscose material, it offers excellent conformability, allowing smooth and even application around body contours.

The padding repels water and dries easily, helping to maintain hygiene and comfort during prolonged use.

Its lightweight, air-permeable structure promotes ventilation and minimizes skin irritation, while its durable and uniform texture ensures consistent protection.

Suitable for use under both plaster of paris and fiberglass casts, it delivers superior patient comfort and reliable performance throughout the immobilization period.

KEY FEATURES

SOFT & COMFORTABLE

Provides a soft, cushiony layer that enhances patient comfort and prevents skin irritation.

EXCELLENT CONFORMABILITY

Easily conforms to body contours for smooth, even application under casts and splints.

WATER REPELLENT

Repels water and dries quickly, helping to maintain hygiene and comfort during prolonged use.

AIR-PERMEABLE

Promotes air circulation to keep skin cool and reduce risk of moisture buildup.

DURABLE & UNIFORM

High-quality non-woven viscose ensures consistent protection and long-lasting performance.

COMPATIBLE & VERSATILE

Ideal for use under both plaster of paris and fiberglass casts.

APPLICATIONS

Protective under-layer beneath orthopedic casts and splints

Prevents skin irritation, friction, and pressure sores

Fracture management and orthopaedic immobilization

Post-operative care and support

Suitable for both upper and lower limb applications

WOUND CARE & MEDICAL CONSUMABLES

KHETSI INTERNATIONAL

INDIAN ROOTS, GLOBAL STANDARDS

GAUZE SWAB / GAUZE COMPRESS

Crafted with precision and care, our Gauze Swab/ Gauze Compress is made from high-quality absorbent cotton gauze conforming to EN 14079 standards (17 threads). Each swab/compress is designed with cut edges neatly folded in (ES type) to prevent loose threads and ensure safety in clinical use.

The swabs can be unfolded multiple times to obtain larger sizes without any fraying, offering flexibility during dressing and wound management.

Soft, supple, and highly absorbent, they allow optimal air permeability to promote faster healing.

Available in various plies, both sterile and non-sterile, also available with X-Ray Detectable line and sterilized by ethylene oxide (ETO) for uncompromising hygiene – a trusted choice for surgical, clinical, and general wound care applications.

100% COTTON GAUZE

High-quality cotton gauze conforming to EN 14079 (17 threads)

HIGH ABSORBENCY

Excellent absorption of blood and exudates

ES TYPE (FOLDED EDGES)

Cut edges folded in prevents loose threads & ensures safety

MULTIPLE UNFOLDS

Can be unfolded multiple times without fraying

AIR PERMEABLE

Soft, supple & allows air permeability to promote faster healing

STERILE & SAFE

Sterile (ETO sterilized) and non-sterile options available

X-RAY DETECTABLE

Available with X-Ray detectable thread

KEY FEATURES

EN 14079 COMPLIANT

Made from high-quality absorbent cotton gauze conforming to EN 14079 standards (17 threads).

FOLDED EDGE (ES TYPE)

Cut edges are neatly folded in to prevent loose threads and ensure safety in clinical use.

MULTIPLE UNFOLDS

Can be unfolded multiple times to obtain larger sizes without any fraying.

HIGHLY ABSORBENT

Excellent absorption of blood and exudates for effective wound care.

AIR PERMEABLE

Allows optimal air circulation to promote faster healing and reduce maceration.

STERILE & HYGIENIC

Available in sterile (ETO sterilized) and non-sterile options for maximum hygiene.

X-RAY DETECTABLE

Available with X-Ray detectable line for enhanced safety in surgical procedures.

APPLICATION

Ideal for absorption of blood and exudates.

Wound cleansing and general wound dressing.

Suitable for use during minor and major operations.

Post-operative wound care.

First-aid procedures.

KHETSI INTERNATIONAL

INDIAN ROOTS, GLOBAL STANDARDS

STERILE PARAFFIN GAUZE DRESSING

Designed for gentle and effective wound care, ensuring consistent quality and reliability.

Our sterile paraffin gauze dressing is made from specially woven leno-cloth cotton gauze impregnated with soft paraffin to ensure low-adherence, soothing contact layer.

Each dressing is individually packed using a special translucent paper that minimizes loss of medication upon removal, preserving product integrity and effectiveness.

The interlocking threads prevent fraying when cut to size, making it ideal for burns, skin-loss injuries, graft sites, and general wound management.

- ✓ LOW-ADHERENT
- ✓ SOOTHING & PROTECTIVE
- ✓ FRAY RESISTANT
- ✓ STERILE & SAFE
- ✓ RETAINS MEDICATION INTEGRITY

KEY FEATURES

LOW-ADHERENT PARAFFIN LAYER

Soft paraffin ensures a non-stick, soothing contact with the wound, minimizing pain and trauma.

SPECIALLY WOVEN LENO-CLOTH GAUZE

Interlocking threads prevent fraying when cut to size, ensuring safe and easy application.

MAINTAINS MOIST HEALING ENVIRONMENT

Helps keep the wound moist, supporting faster healing and patient comfort.

TRANSLUCENT PAPER PACKAGING

Individually packed with special translucent paper to minimize loss of medication and maintain product integrity.

STERILE & SAFE

Individually sterile packed to ensure maximum hygiene and reduce the risk of infection.

GENTLE & EFFECTIVE

Provides gentle care and reliable protection for a wide range of superficial wounds.

APPLICATIONS

Indicated for use in the treatment of minor burns

Suitable for skin grafts (donor and recipient sites)

Effective for ulcers

Useful for lacerations

Ideal for other superficial wounds

The low-adherent paraffin layer protects the wound and maintains a moist healing environment

WOUND CARE & MEDICAL CONSUMABLES

KHETSI INTERNATIONAL

INDIAN ROOTS, GLOBAL STANDARDS

STERILE CHLORHEXIDINE GAUZE DRESSING

Designed for safe and effective wound care, ensuring consistent quality and reliability. Our sterile chlorhexidine gauze dressing combines soft, specially woven leno-cloth cotton gauze with chlorhexidine acetate, a proven antiseptic agent active against a wide range of Gram-positive and Gram-negative bacteria.

The low-adherent contact layer minimizes trauma during dressing changes while maintaining an optimal healing environment. Each dressing is packed with a special translucent paper to ensure minimal loss of medication upon removal, preserving the full antiseptic efficacy.

Ideal for use in surgical wounds, graft sites, ulcers, and other at-risk wounds requiring antimicrobial protection and gentle care.

POWERED BY CHLORHEXIDINE ACETATE

A proven antiseptic agent active against a wide range of Gram-positive and Gram-negative bacteria.

QUALITY ASSURANCE

Manufactured in facilities certified with International Quality Standards.

CONSISTENT QUALITY

Strict in-process and final quality checks to ensure consistency.

BATCH TRACEABILITY

Batch traceability and documentation available.

MADE IN INDIA

Proudly manufactured in India for global healthcare markets.

KEY FEATURES

BROAD-SPECTRUM ANTISEPTIC

Chlorhexidine acetate provides effective action against a wide range of Gram-positive and Gram-negative bacteria.

LOW-ADHERENT CONTACT LAYER

Minimizes trauma and pain during dressing changes while supporting undisturbed healing.

OPTIMAL HEALING ENVIRONMENT

Maintains moisture balance and protects the wound site for faster and safer recovery.

SPECIAL TRANSLUCENT PAPER PACKAGING

Ensures minimal loss of medication upon removal and preserves full antiseptic efficacy.

STERILE & SAFE

Individually sterile packed to ensure maximum hygiene and patient safety.

SOFT & COMFORTABLE

Specially woven leno-cloth cotton gauze provides gentle care and patient comfort.

VERSATILE APPLICATION

Suitable for a wide range of wounds requiring antimicrobial protection and gentle care.

APPLICATIONS

Recommended for use in the prevention and treatment of infection in wounds

Ideal for surgical wounds

Suitable for skin grafts

Effective for burns

Helps in the management of ulcers

Useful for lacerations

The chlorhexidine content provides broad-spectrum antimicrobial protection

AVAILABLE SIZES

WOUND CARE & MEDICAL CONSUMABLES

COMBINED SURGICAL PAD

Designed for high absorbency and patient comfort, our Combined Surgical Pad is made from premium-quality absorbent cotton layers enclosed in a soft, non-woven fabric.

It ensures excellent fluid retention, protecting the wound site and maintaining cleanliness throughout surgical and post-operative procedures.

The pre-sterilized pad guarantees complete hygiene and safety, making it ideal for use in operation theatres, dressing rooms, and general wound care.

Soft, secure, and reliable – it supports efficient wound management with uncompromised care.

HIGH ABSORBENCY

Ensures excellent fluid retention.

PRE-STERILIZED

Guaranteed hygiene and safety.

SOFT & COMFORTABLE

Gentle on skin and promotes patient comfort.

SAFF & RELIABLE

Maintains cleanliness and protects the wound site.

KEY FEATURES

PREMIUM QUALITY MATERIAL

Made from high-quality absorbent cotton layers enclosed in soft, non-woven fabric.

EXCELLENT ABSORBENCY

High absorbency ensures rapid uptake and retention of blood and exudates.

STERILE & HYGIENIC

Pre-sterilized using EO process to ensure complete hygiene and safety.

SOFT & LINT-FREE

Soft, lint-free surface minimizes irritation and ensures patient comfort.

SECURE & EFFECTIVE

Maintains a clean and dry environment, promoting faster healing and better recovery.

VERSATILE APPLICATION

Suitable for use in operation theatres, dressing rooms, and general wound care.

APPLICATIONS

Intended for use in operation theatres

For dressing procedures

Post-operative wound care

Absorption of blood and exudates

Provides an effective protective layer over surgical or traumatic wounds

Maintains a clean and dry environment that promotes healing

STERILE EO X-RAY DETECTABLE ABDOMINAL PAD

Designed for precision and safety in surgical care, our Sterile EO X-Ray Detectable Abdominal Pad is made from highly absorbent 100% cotton gauze fabric conforming to EN 14079 standards (17 threads). With soft layers that ensures excellent blood absorption and which is stitched from all 4 sides.

Each pad is equipped with an X-ray detectable thread, allowing easy identification and retrieval during surgical procedures – preventing the retention of unwanted materials.

EO-sterilized for maximum hygiene, it is ideal for use in abdominal surgeries and other major operations, offering reliable absorbency, softness, and patient comfort at every stage of care.

100% COTTON GAUZE

Highly absorbent cotton gauze conforming to EN 14079

EXCELLENT ABSORBENCY

Soft layers ensure superior absorption of blood and body fluids

STITCHED ON ALL 4 SIDES

Ensures strength, durability, and prevents fraying

X-RAY DETECTABLE THREAD

Easy identification and retrieval to prevent retention of surgical materials

EO-STERILIZED

Ethylene Oxide sterilization ensures maximum hygiene and safety

KEY FEATURES

EN 14079 COMPLIANT

Made from 100% cotton gauze fabric conforming to EN 14079 standards (17 threads).

HIGH ABSORBENCY

Excellent blood and fluid absorption for effective surgical performance.

STITCHED FROM ALL 4 SIDES

Ensures durability, strength, and prevents fraying during use.

X-RAY DETECTABLE THREAD

Allows easy identification and retrieval during surgery, ensuring patient safety.

EO-STERILIZED

Sterilized using Ethylene Oxide process to ensure maximum hygiene and safety.

SOFT & COMFORTABLE

Gentle on tissues, providing patient comfort during and after surgery.

IDEAL FOR MAJOR SURGERIES

Perfect for abdominal surgeries and other major operations.

APPLICATION

Intended for use in abdominal and general surgical procedures for the absorption of blood and body fluids.

The X-ray detectable thread ensures easy identification and retrieval, helping to prevent the retention of surgical materials inside the body.

Also suitable for post-operative wound care where high absorbency and patient comfort are essential.

VARIANTS

- Unsterile Bulk Packaging.
- Ready-to-Sterilize Packaging (Autoclavable Pack).
- Any customized packaging as per the requirements of the customer.

MADE IN INDIA

Proudly manufactured in India for global healthcare markets.

QUALITY & MANUFACTURING STANDARDS

Designed Around Consistency.
Built Around Compliance.

In healthcare procurement, quality is measured long before a product reaches the end user. It begins with disciplined manufacturing processes, validated quality systems, consistent production standards, and complete documentation that supports international trade.

At Khetsi International LLP, we collaborate with manufacturing partners committed to internationally recognized quality practices, ensuring every procurement program is supported by structured manufacturing processes and export-ready documentation.

1. MANUFACTURING QUALITY SYSTEMS

Manufacturing partners operate under internationally recognized quality management systems designed to promote process control, product consistency, and continuous improvement.

2. PRODUCT TRACEABILITY

Structured batch identification and production records enable product traceability throughout the manufacturing and supply process, supporting transparency and quality control.

3. BATCH CONSISTENCY

Standardized production procedures, controlled manufacturing environments, and routine quality inspections help maintain consistency across production batches.

4. EXPORT DOCUMENTATION

Comprehensive export documentation—including commercial, shipping, and product-related documentation—is coordinated to support efficient international procurement.

5. REGULATORY SUPPORT

Where applicable, products are manufactured in accordance with relevant international standards and supported by technical documentation required for export markets.

6. OEM & PRIVATE LABEL MANUFACTURING

Flexible OEM and private label manufacturing solutions support distributors, healthcare brands, and institutional buyers seeking customized branding, packaging, and product specifications.

“

OUR COMMITMENT

Quality is not defined by a certificate alone.

It is reflected in the consistency of every production batch, the discipline of every manufacturing process, and the confidence every shipment delivers.

”

PRIVATE LABEL & OEM

BUILD MORE THAN A PRODUCT PORTFOLIO.
BUILD **YOUR BRAND.**

Every successful healthcare distributor eventually reaches the same decision.

Do you continue building someone else's brand—or begin building your own?

Private label manufacturing is more than changing a logo on a package. It is an opportunity to strengthen customer loyalty, differentiate your business, improve commercial positioning, and create long-term brand value within your market.

At Khetsi International LLP, we help healthcare distributors transform proven manufacturing capabilities into products that reflect their own identity.

Whether you are launching a new healthcare brand or expanding an existing portfolio, we work with our manufacturing partners to support a structured and professional private label journey.

★
**YOUR BRAND.
YOUR IDENTITY.
YOUR GROWTH.**

WHY PRIVATE LABEL?

BUILD BRAND RECOGNITION

Create a healthcare brand your customers remember—not simply another product they purchase.

STRENGTHEN CUSTOMER LOYALTY

When customers trust your brand, they return to your business—not to the original manufacturer.

DIFFERENTIATE YOUR BUSINESS

Offer products that are uniquely positioned within your market instead of competing solely on identical products.

CREATE LONG-TERM COMMERCIAL VALUE

A strong private label becomes a business asset that grows alongside your distribution network and market presence.

HOW KHETSI INTERNATIONAL LLP SUPPORTS YOUR JOURNEY

- ✓ Product selection aligned with your market
- ✓ OEM & private label manufacturing coordination
- ✓ Packaging and artwork customization
- ✓ Label and carton development
- ✓ Documentation for international markets
- ✓ Procurement and export coordination
- ✓ Scalable manufacturing for business growth

**YOUR DESIGN.
YOUR BRAND.**

**OUR QUALITY.
OUR COMMITMENT.**

**SHARED GROWTH.
LONG-TERM PARTNERSHIP.**

FROM MANUFACTURING TO MARKET

Your competitive advantage is not the factory. It is the brand your customers choose, trust, and recommend.

Khetsi International LLP helps you build that advantage by combining India's manufacturing strength with your market vision.

“

KHETSI INTERNATIONAL PERSPECTIVE

The most valuable product in your portfolio is not the one carrying a manufacturer's name.
It is the one carrying yours.

”

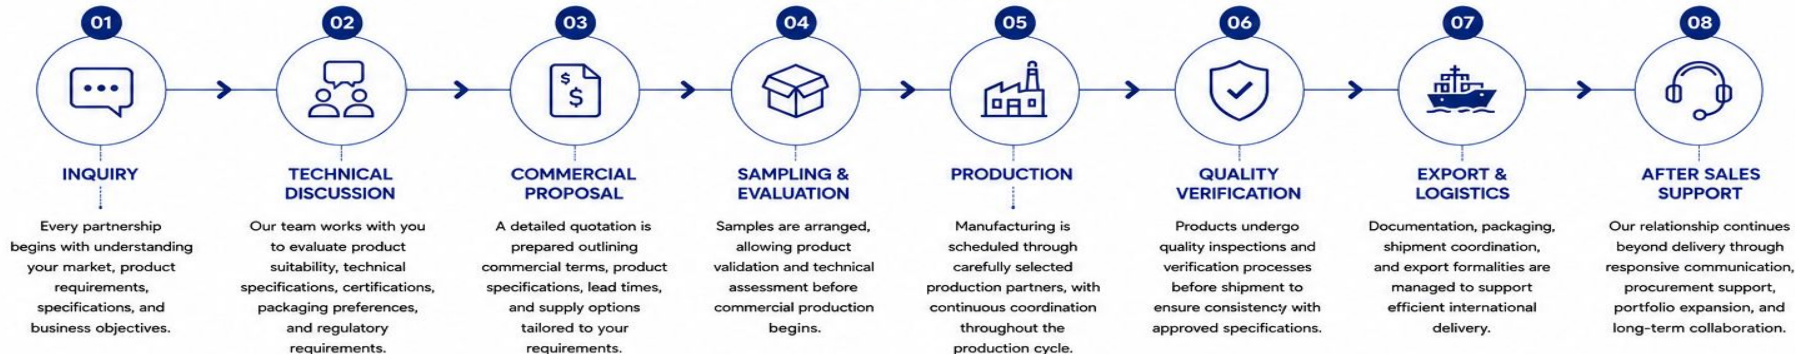

WORKING WITH KHETSI INTERNATIONAL LLP

A Structured Process. A Transparent Partnership.

Successful international procurement is built on clarity, communication, and disciplined execution. From the first conversation to post-delivery support, every stage is designed to provide visibility, reduce uncertainty, and ensure a seamless procurement experience.

Our process combines commercial understanding, manufacturing coordination, quality oversight, and export execution into one structured workflow—allowing healthcare distributors to focus on growing their business while we manage the operational complexity.

OUR PROCUREMENT JOURNEY

OUR PROMISE THROUGHOUT EVERY ORDER

TRANSPARENT COMMUNICATION

Open, proactive, and consistent at every step.

CLEARLY DEFINED TIMELINES

Realistic timelines communicated and strictly followed.

COORDINATED PROCUREMENT

End-to-end coordination for a seamless procurement experience.

PROFESSIONAL DOCUMENTATION

Accurate, compliant, and export-ready documentation at every stage.

QUALITY-FOCUSED EXECUTION

Quality is built into every process, not just inspected at the end.

LONG-TERM BUSINESS SUPPORT

We grow with you through continuous support and portfolio expansion.

“

THE KHETSI INTERNATIONAL COMMITMENT

Every shipment marks the completion of an order—but the **continuation of a partnership.**
